

Diane Davis: Back to the Stone Age
February 19, 2010

As a Health Care worker I am disgusted with SAHO's final offer. With their offer we are moving back to the Stone Age, instead of moving forward.

SAHO has no respect for the front line workers. With their attitude it shows that the care we give to patients and residents of long term is not important.

Residents of our community need to know the truth.

SAHO's actions are about power and not the real issues.
