

Diane Mitschke: Insulted by SAHO's final offer

I'm insulted by this "Final offer." This offer is slave wages, slave labour. There have been numerous postings and no one has applied. Who is going to do the work?

We are deemed "essential." How essential are we when the employer doesn't even want to offer us decent wages, decent hours of work and some type of family friendly employment. Everyone needs a job.

Health care workers are there to provide the care for the health of clients. We do work that a lot of people wouldn't even think of doing. We aren't looking for a pat on the back. We need a living wage. We shouldn't have to fight for every nickel. We are not being unreasonable.
