

Molyann Zerr: Disappointed

I feel the RNs got more than their fair share in the last contract. The government, SAHO, and the public forget that the RN now earns about \$ 47 an hour at the top of their pay scale. The SAHO team forgets that the support staff helps the RNs do their jobs.

SAHO should look at the fact that we keep our facilities running and we should not have to fight to be rewarded for doing our jobs.
